

Christmas skip & our 12 acts of kindness

We love making special wraps at key times during the year. Every December we like to create a festive one and we think this year's is pretty special. Not only is our skip looking wonderfully Christmassy but we're also running a 12 Acts of Kindness campaign too.

For 12 days during the Christmas build-up, we're donating items to various worthy causes in the area including The Gifts of Giving in Bridgwater to help teenagers and the town's Food Bank. Please follow our progress on our social media channels, you can find the links at the bottom of this newsletter.

Spotlight on BoomBags

Our [BoomBags](#), which are available in two sizes, Midi and Mega, provide convenience for consumers and commercial contractors. They're strong enough for all types of waste and, if you don't have much space, they are a brilliant alternative to skips.

Plus, because we understand that it's essential to ensure your project runs smoothly, we've also made it even easier for you to get a [quote and book](#).

For our next day service, orders can be placed securely online before 12pm, excluding weekends and during our Christmas break. We'll post the bag to you.

Then, when you are ready, contact us online to book a collection or call us on [01278 457598](tel:01278457598). We aim to collect your bag within five working days from your request. It couldn't be easier!

Our new tipper lorry

We've recently taken delivery of a shiny new tipper lorry. It's just six months old and is exactly what we've been looking for to add to our fleet. We offer tipper hire by the hour or on a price per load basis, depending on your needs.

Brownfield site soil remediation

It's always so positive to see brownfield sites being remediated and put to good use. The area gets cleaned up, work is created for a number of contractors with the added bonus of future employment for many in the local and surrounding areas – a win, win situation!

We have recently started the remediation of 12,000 tonnes of asbestos contaminated soil by hand picking and removing any asbestos containing materials, to enable soils to be reused safely on permitted landfill sites elsewhere.

We remove the soils under HSE licensed conditions, which ensures works can continue, without hold-ups, by removal of both higher and lower risk asbestos, when found during the course of the works.
